Data pass from Counties to DOR	Stacey Lustig	Dave Chapman		10/28/2004 4:35 PM
Data pass from Counties to DOR	Dave Chapman	Stacey Lustig	David, This work order was amended. In the originally approved table structure all types of accounts had separate Account summary and detail tables, while the owner information was shared for all types of accounts. The new structure has a shared Account level table for all types of accounts rather than having them separate. Very few fields were different and this new structure handles the data more simply. The new structure also includes the field "Jurisdiction" This will contain the actual name of each county. This will allow the counties to eventually have more than one value area if they choose to. The original structure would not allow this. Please review the changes.	10/28/2004 3:42 PM
Data pass from Counties to DOR	Robert Alers (CCI)	Kevin OConnell	Kevin O - Replaced amended workorder with 'amended2' workorder per Stacey	10/25/2004 2:44 PM
Data pass from Counties to DOR	Robert Alers (CCI)	Kevin OConnell	I have added an amended workorder for DOR review. A senior programmer for CCI has recommended using a different structure for the additions to DataMart. These changes have been reviewed by Stacey Lustig and she feels this proposed structure is superior to the structure in the original workorder. This original workorder was originally approved on 10/7/2004. I have changed the status from 'in progress' to 'ready for DOR sign off'. If approved please change status to ready for CCI to schedule and indicate approval of the amended workorder in the comments.	10/25/2004 2:35 PM

Data pass from Counties to DOR	Kevin OConnell	Dave Chapman	It is very difficult for us to identify if this list is complete. It looks pretty good, however, it must contain state assessed values, pp, AG, res, commercial, etc. The following link is to a copy of our Department Annual Report. We would like to generate at least a part of this data from the CAMA system: http://revenue/PortalVBVS/uploads/2003AnnualReport.pdf Other than that, maybe we can make changes in the next build if we miss something. -dc	10/1/2004 9:51 AM
