Allow for Obsolescence in Personal Property & Oil and Gas	 Dave Chapman	 Stacey Lustig	I still do not clearly understand the requested calculation for Obs. If we take $(FObs\% * RCNLD) + (EconObs\% * RCNLD) + (OtherObs\% * RCNLD)$ we get a different number than if we take $(FObs\% + EconObs\% + OtherObsPerc) * RCNLD$. What is the preference for the calculation...or does it need to be done different than either way suggested above? Thanks for your time.	7/1/2005 10:21 AM
Allow for Obsolescence in Personal Property & Oil and Gas	Dave Chapman	Stacey Lustig	David, to clarify we would be calculating the obs against the RCNLD not the RCN.	12/3/2004 4:01 PM
Allow for Obsolescence in Personal Property & Oil and Gas	Dave Chapman	Stacey Lustig	David, We are adding three types of obs. Are they additive or multiplicative? For example would the calculation be $(F\ obs + Econ\ Obs + Other\ Obs) * RCN$ or $(F\ Obs * Econ\ Obs * Other\ Obs) * RCN$?	10/20/2004 2:37 PM
Allow for Obsolescence in Personal Property & Oil and Gas	David Zirtzlaff (CCI)	Stacey Lustig		10/20/2004 2:35 PM
